

3 Metre Four Fork Forklift Attachment with 3 Tonne Lifting Capacity

Our Four Fork Attachments are designed for handling extra wide pallets or long products such as steel or plastic pipes, steel flats or timber. To fit, simply lower the truck forks fully and drive slowly forward until the fork face contacts the beam of the attachment. Then fit the hell pin behind the truck forks. Ensure the attachment is fully secured before use!

Features

- 3 metre width
- 3000 kg safe working load
- Four forks allow wide loads to be supported safely whilst helping reduce product damage
- Heavy duty sleeves offering long service life properties
- Heavy duty cross beam ensures rigidity of the attachment
- Heel pin retention for safely securing the attachment to forklift truck forks
- Finished in safety yellow gloss for visibility when fitted to the lift truck
