NEW

680 mm JIB

JCB Attachments are pleased to announce the launch of the new lifting equipment 680 mm JIB compatible with JCB machines.

- Designed to ensure ease of use and greater control when placing loads
- The 680 mm JIB enables the operator to place a load using crowd and dump
- This attachment is the best choice when you require to place suspended loads close to buildings as the hook is at the very end of the JIB
- This attachment is available for all Q-fit JCB Loadall models*
- This is the only approved 680 mm JIB for JCB machines and testing has been completed to ensure it complies with current lifting legislations
- 680 mm is the distance between the pick-up and the hook
- Capable of lifting loads up to 4T**

* Providing it is within the machine capacity

** Please refer to the lifting and stability charts in your machine to determine maximum lifting weight for the height you are working at
