

DEF CUBE AdBlue Storage Tank 2200L 22DEF

The DEF CUBE Global is a transportable, environmentally secure, double-walled diesel exhaust fluid storage tank that offers extended run time on stage IV/V diesel generators and other non-road mobile machinery. Ideal for both hot and cold climates, the DEF CUBE Global is the ideal solution for the temporary power industry's auxiliary DEF dispensing and replenishment needs.

STACKABLE DESIGN

(2 high full, 3 high empty). Will stack on WG 30TCG diesel tank
Secure lockable compartment for pumps & accessories

LOCKABLE EQUIPMENT CABINET

Secure lockable compartment for pumps & accessories

COMPATIBILITY

Compatible with Stage V gen-sets with onboard lift pump from JCB, Generac etc.

TRANSPORTABLE

Transportable full design.

STAINLESS STEEL

Stainless steel fitting plate that is customisable by end user depending on fittings required.

LIFTABLE FULL

Tank certified for top lift by 3rd party.

STANDARD FIT

Standard fit out includes fill cap, breather vent, pump feed and contents gauge.

FOUR WAY FORKLIFT POCKETS

Forklift pockets and lifting lugs for ease of transport

REMOVABLE INNER TANK

Removable inner polyethylene tank (8mm thick) – ideal for storing DEF

RENTAL READY

Robust 'rental ready' design with outer containment tank.

IDEAL USES AND APPLICATIONS

GENERATORS AND ARXILIARY EQUIPMENT

The DEFCUBE Global can be easily connected to generators to supply DEF in the same way auxiliary diesel tanks are connected to a generator unit.

SHORT TERM DEF REQUIREMENT

The DEFCUBE Global is the ideal solution for short term, onsite DEF storage. Due to its mobile design, the DEFCUBE Global can transport DEF to any site – reaching even the most difficult locations.

TECHNICAL DATA

SPECIFICATIONS

Capacity	2,200 L
Dimensions (L x W x H)	2316 x 1566 x 1326 mm
Cabinet Dimensions (W x H)	368 x 1051 mm
Weight (empty / full)	810 / 3340 kg
Optional Pump	240V, 12V and Handpump options
