Secured by Design

Official Police Security Initiative

As standard Prime Secure –

- Provide a free quote
- Carry out a free site survey
- Make regular post install service visits
- Carry out free quarterly Redeployments to ensure complete coverage is maintained for the duration

Secured by Design Accreditation

The VPod holds the “Secured by Design” (SBD) accreditation – a police initiative awarded to products which are designed to a police preferred specification.

This accreditation requires the VPod to undergo rigorous testing by an independent third-party certification body accredited by UKAS.

Regular re-tests are carried out by SBD on the VPod and on our production facility to ensure correct processes are maintained constantly to provide a more secure and reliable product.
